Each gown tells a unique story, symbolizing the journey of the wearer as they illuminate the world with their inner light.

CASSIOPEIA is crafted from the finest chantilly lace and adorned with delicate sparkles, this gown is a masterpiece of elegance and sophistication. **MOONLIGHT** is another small step to perfection, elegance and grace personified. Handcrafted with intricate details and delicate pearl embellishments, this gown captures the essence of the moon's gentle radiance. **STARDUST Dreams** is like stardust sprinkled across the night sky. The silk, the lace, the beads and magical illusion top add another level of glow that you can never have otherwise. **STELLA** is crafted to embody the brilliance of a stellar explosion. **MIRA** is a red star. **AURORA** blue - like the dancing lights of the Aurora Borealis, this mesmerizing dress stuns with iridescent hues of the blue silk, illusion top and graceful silhouette

The collection was developed during the new moon, but it’s what it sets in motion that makes it special – released during a lunar eclipse and a solar eclipse. The full collection is still to be uncovered throughout the celestial cycle of the year so follow for more discovery...
